

String Problem:

```
#include <stdio.h>
#include <string.h>
int main(){
    char str[40];
    printf ("\nEnter string: ");
    scanf ("%s", str);

    for(int i=0;str[i]!='\0';i++){
        if(str[i] == '_' && str[i+1] == '_' && str[i+2] == '_'){
            for(int j=i+1;str[j]!='\0';j++){
                str[j]=str[j+2];
            }
        }
    }
    for(int i=0;str[i]!='\0';i++){
        if(str[i] == '_' && str[i+1] == '_'){
            for(int j=i;str[j]!='\0';j++){
                str[j+1]=str[j+2];
            }
        }
    }

    printf("%s", str);
    return 0;
}
```

```
Enter string: I__love___Bangladesh__Country
I_love_Bangladesh_Country
Process returned 0 (0x0)    execution time : 30.762 s
